I took a few minutes and revised the issue paper. Mainly reordered the paragraphs for flow. Not sure how to make it more “regional” in tone when it is a broader scope than the other “national” paper.

I think that this afternoon at 3:00 would be perfect, if you don't mind me usurping that time. Where do you meet?

Cindy – is there a deadline? Mike, Phil and I (among others) meet every Tuesday from 3 to 4 on oil/gas issues. We could use that time slot or try to meet earlier this afternoon.

Do they understand that the “national” paper is very limited in scope and only addresses the water discharge aspect of unconventional drilling? Our paper is actually broader than the “national” paper.

I am available any time this afternoon to get together.

Guys –

We have an opportunity to make our HF fact sheet much more Region-specific. We could note specific concerns about seismicity in Arkansas, for example, and expand on the nonattainment issue. I am available to assist in this effort – would you like to get together in a conference room this afternoon for a few minutes to hash out a new version?

See message below and files attached for more.

Cynthia, OCFO feedback is that the Region 6 paper is duplicative of a national paper we already have. I thought if you made your paper more specific to Region 6 we might be able to get it in the Administrator's briefing book. As a suggestion I moved one bullet, that included Bartlett Shale, from the background to the beginning of the answer. I hope you will be able to do a much better job than I. Also, attached is the national paper.

Hi Cynthia,

The OCFO guidance says that factsheets can't exceed one page. And you can't change the margins or font.

Also, the answer is much too long. OCFO guidance says answers are restricted to 2 to 3 bullets of one to 2 sentences each. Answers have to be brief so that the witness can respond quickly.

If you will revise the paper down to one page and change the answer to conform with the guidance I will begin our approval process.

Louise, Omayra and Tim –

I'm sending this fact sheet from Region 6 to all three of you because it describes impacts to both air and water quality. I'm guessing you have already decided among yourselves whether OAR or OW will take it from here.

This is item #11 on the list of topics attached to the memo of March 15. Please let me know if you have any questions.
